Estimator/Project Manager in North Salt Lake:

Intelligent, self-starter who is detail oriented, organized, determined and hardworking with the ability to remember details and excellent leadership and communication skills. Experience with heavy civil projects is preferred, but not required. Four year degree in construction management, civil engineering or math related field. Engineering background with a PE stamp would also be a bonus, but is not required.

Responsibilities would include bidding and managing projects from discovery to final completion and assisting in management of all aspects of a midsized construction company. They should anticipate a typical work week of ~45-55 hours, which will fluctuate depending on the season and workload.

Salary range would start at $40 to $75K/year depending on experience. Benefits include a company vehicle, 401K match, paid vacation, gym access, performance bonuses and health, dental and vision for the employee and his/her family.

Job Type: Full-time
Salary: $75,000.00 /year
Required education: Bachelor's Degree

I was asked to send this to all of Juniors, Seniors, and Alum that are seeking employment.
