Title of Study: Analysis of Urinary Biomarkers in the Study of Behaviors

Experiment Open Date: Feb. 2, 2016  Experiment Close Date: March 10, 2016

(IRB) Approval Number: 16-HP-009

Participation Credits: 4 Credits

Time (duration): Two (2) Fifteen minute sessions and urine collection at home. The first meeting will cover informed consent and the research objectives. The second meeting will allow participants to complete a brief survey and return their urine sample. It is anticipated that participants will require an additional 30 minutes to transport their urine sample to campus to return to researchers.

Brief Description of Study:
Each participant, after providing informed consent, will be given a sterile sample cup to take home and collect a urine sample first thing in the morning. When they return the sample to the investigators, they will fill out a brief survey. The urine will be analyzed for specific biomarkers and correlated to behavioral tendencies reported on the survey.

Participation Criteria
Adults 18 and older may participate in this study.

Location
Mondays: 8:00am – 12:30 Social Sciences 332
Tuesdays: 8:00am – 10:30 Social Sciences 332
Thursdays: 8:00am – 10:30 Social Sciences 332
Fridays: 8:00am – 9:20 Social Sciences 332
