Title of Study: What is Relationship Fidelity?

Experiment Open Date: March 1, 2016   Experiment Close Date: April 01, 2016

(IRB) Approval Number: 16-SS-201

Participation Credits: 3 credits

Time (duration): Approximately 45 min. (15 min for Part I and 30 min for Part II)

Brief Description of Study: The purpose of this study is to investigate how relationship fidelity is defined in our culture.

The study is broken down into two parts.

Part I: You will be asked to share your definition of relationship fidelity using an encrypted online survey. Your responses will be combined with others without any personal identifying information. You will then wait approximately 2 weeks before we send you an email to complete part 2 of the study.

Part II: After we have categorized all participant responses from part one, you will receive an email requesting that you review our summary and confirm that our summary of the data adequately captures your definition of relationship fidelity.

Participation Criteria
Students between the ages of 18 to 65 may participate in this study.

Location: bit.ly/wsufidelity

Researchers:
Dr. Todd Baird (Department of Psychology)
Dr. Mark Adams (Department of Child and Family Studies)
Roberta Brassel (BIS Student)

Questions?
Please contact Dr. Todd Baird at tbaird@weber.edu if you have questions. Please include the Study Number in the subject line of the email.
