### Check Brakes/Measure Front and Rear Lining

- [ ] Lower Front Lining
- [ ] Lower Rear Lining

### Additional Checks
- Inspect for visible leaks:
  - Fuel system (also including gas cap seating)
  - Engine, transmission, drive axle, transfer case
  - Engine cooling system
  - Shocks and struts – also check operation

In addition to inspections noted on the front side of this form, also complete the following for MI:

- Change engine oil and filter. Reset oil life system.
- Rotate and inspect tires. Check inflation pressures and wear.
- Trucks: lubricate front suspension, ball joints, steering linkage, and parking brake cable.
- Trucks with Allison Transmission only: inspect external control – main filter, replace if necessary.
- Perform any additional services. See “Additional Required Services” in Owner’s Manual.

In addition to listed MI menu, also complete the following for MII:

- Clean outside of radiator and condenser; pressure-check cooling system and cap.
- Inspect radiator and heater hoses for cracks, swelling, or deterioration.
- Lubricate suspension, steering linkage, and transaxle shift linkage.
- Inspect safety belts, buckles, latch plates, retractors, anchorages, and safety belt reminder light for damage or loose parts.
- Lubricate key lock cylinders, body door hinges, hood, door, and trunk hinges.
- Inspect throttle linkage and ignition wires.
- Inspect steering system and suspension for damage, loose, or missing parts.
- Inspect power steering lines and hoses for leaks or damage.
- Inspect brake-transaxle shift interlock for correct operation.
- Trucks: check transmission fluid level; add fluid if necessary.
- Trucks without a filter restriction indicator: replace engine air cleaning filter.
- Perform any additional services. See “Additional Required Services” in Owner’s Manual.

**ADDITIONAL REQUIRED SERVICES** (see service manual for mileage intervals)

- Inspect fuel system for damage or leaks.
- Replace engine air cleaner filter. *An emission-control service.*
- Supercharger service (if equipped). *An emission-control service.*
- Change automatic transaxle fluid and filter (severe service).
- Change automatic transaxle fluid and filter (normal service).
- Replace spark plugs, inspect spark plug wires. *An emission-control service.*
- Engine cooling system service (every 150,000 miles or every 5 years, whichever occurs first). *An emission-control service.*
- Inspect accessory drive belt. *An emission-control service.*

* If tires are replaced this visit, measure and record the new parts readings.

** Since front pads wear faster, only enter rears as lowest readings if they measure yellow or red.
HOW TO CONDUCT A VEHICLE INSPECTION

• While in vehicle:
  – If MI or MII, record remaining engine oil life.
  – Check operation/condition of horn, interior lights, turn signals, hazard lights – turn on exterior lamps.
  – Check operation of windshield wipers and windshield washer spray.
  – For OnStar status, check GMVIS. To request activation, have customer press OnStar Blue Button. OnStar Hands-Free Calling – Store dealership phone number and demonstrate “Call” function.
  – Inspect windshield for cracks, chips or pitting.
  – Crank steering wheel to the left to expose front left tire tread.
  – Pop the hood.

• Exiting the vehicle:
  – Inspect left windshield wiper blade.
  – Inspect left front tire (show customer how you measure tread depth).
  – Open hood and check fluid levels (at minimum, point out which will be checked).
  – Note front headlamp operation and lens condition.
  – Inspect right front tire tread depth.
  – Inspect right windshield wiper blade.
  – Inspect right rear tire tread depth.
  – Note tail lamp operation and lens condition.
  – Inspect rear windshield wiper blade, if equipped.
  – Inspect left rear tire tread depth.
  – Check gas cap seating.
  – Note overall condition of body, painted surfaces, and exterior side mirrors (record in comments section).
  – Turn off exterior lamps.

• Record all vehicle observations on Inspection Form and discuss findings with customer.
