Chemistry of Art  
HNRS 2030

Fall 2019, August 26 – December 13  
M/W, 11:00 am – 12:20 pm  
Tracy Hall Science Center & Kimball Visual Arts Center  
Professors – Brandon Burnett & Dianna Huxhold

This course is a special investigation of the relationship between chemistry and visual art. Students will learn about different art media from a macroscopic and molecular perspective. This course will also include hands-on visual art projects using media discussed in class including, but not limited to, painting, graphite pencils, and charcoal.
