Podcast Production

Baltazar (Communications)
Alexander (Women & Gender Studies)

- This course will acquaint students with all aspects of podcasting and help them become better storytellers. Students will learn the components of podcast production including: interviewing, story development, script writing, interview techniques, remote and digital audio recording, editing of sound, mixing and final production for streaming. Throughout the semester, students will produce a multiple episode 30-45 min podcast around the selected theme chosen for the semester.

10:00-11:15 • Tuesday Thursday
