WSU’s Honors Program presents a new course designed especially for Aletheia students in their junior or senior years. In the class, students from a variety of majors explore issues within their own fields. This exciting course will broaden and deepen each student’s understanding of his or her major and how that major fits in the larger world. This class is limited in enrollment, so register early. It will be offered once a year during spring semester, and it may be taken up to two times for credit.
