Seeking Psychiatric Nurse Practitioner (or APRN) to assume current patient caseload, working with children, adolescents and families. Seeking an individual to join our growing interdisciplinary behavioral health care practice. Location in South Ogden.

We strive for exceptional quality of services to individuals and families in our community using an interdisciplinary approach. We focus on evidence-based treatments, and partnering with healthcare providers, families, and their community support systems to ensure highest quality care possible for our clients/patients.

This position would assume a current caseload of patients in our Ogden office (we have offices located in Ogden, Layton, Bountiful, and Salt Lake City, although our patients are seen primarily in our Ogden office).

Successful candidates are compassionate, hold a high level of integrity, are team players, seek continued learning and growth, and are committed to providing extraordinary care.

- Flexible Schedule (Position is assuming current caseload that is 3/4 time, but will grow into full-time)
- Compensation Based on Reimbursement Rates, experience and licensure.

**Responsibilities and Duties**

* Mental health assessment, diagnosis, medication management with children, adolescents and young adults. Work in multidisciplinary, collaborative behavioral health care practice environment. Provide treatment with full scope of therapeutic skills including prescribing, and referrals. Maintain confidentiality of clients and practice / HIPPA compliant.

**Qualifications and Skills**

* Psych Mental Health Nurse Practitioner (PMHNP) / APRN licensure in Utah in good standing
* American Nursing Credentialing Center (ANCC) Certification
* Collaboration with psychotherapists and other behavioral health care providers
* Effective provision of evidence-based psychiatric medication management and treatment to children, adolescents and young adults
* Accurate and comprehensive written and electronic documentation
* Proficient in measuring treatment effectiveness
* Adherence to ethical standards of clinical practice
* Competency working with diverse populations
* Successful background check
