"What is going on in this world?!"

That was the statement from one of our CSBS professors as they told me about the tragic events unfolding at UNLV in Las Vegas, Nevada. It caused me to reflect what solutions may exist to address some of the most pressing of our societal ills. I thought about the work that is being done in our college helping our students gain an appreciation of the diversity that exists in our world. I thought about new courses and programs like in religious studies (through the Department of History), ethnic studies (through the Department of Sociology & Anthropology), and the ethics certificate (through the Department of Political Science & Philosophy). I pondered on what Dr. Stephanie Wolfe’s Model UN students, who traveled to San Francisco and Germany this year, learned by representing the interests of other countries and cultures. I considered deleting my Facebook account after reading about research done by a CJ graduate student looking at the relationship between social media and fear of crime. All in all, powerful, life-changing experiences for our students.

In the end though, I was drawn to a 2022 study published in *The Journal of Positive Psychology*. The authors investigated the effect of three therapies aimed at helping reduce anxiety and depression. While all three therapies were successful at reducing the effects of these emotionally disabling conditions, one was found to be more advantageous: acts of kindness. Participants who performed 3 acts of kindness a day on two days of the week demonstrated better social connection, improvement in anxiety/depression symptoms and greater life satisfaction than those who had cognitive therapy. Acts of kindness do require a bit of our time and attention and resources, but they don't require expensive medical visits, ongoing monitoring to tune therapies, or managing the side effects of medications. Just a little TLC for the world around you to improve the lives of others...and you.

So as the snow begins to fall around us, I invite you to take out your shovel. After you have finished your driveway, do your neighbor's next. Then, after the cookies are done baking in your oven, take a plate over for them to enjoy with you. Or maybe join Dean Julie Rich and a group of WSU students on their next study abroad adventure to a far away place to build a school or water supply for a village in desperate need of basic life necessities. As your enemies come knocking at your gate this season, give them the gift of kindness.

- DR. BRENT HORN

ASSOCIATE DEAN, COLLEGE OF SOCIAL & BEHAVIORAL SCIENCES

ETHNIC STUDIES MINOR

Department of Sociology & Anthropology
Ethnic studies is about learning who we are as individuals, communities and as a country. Students often experience profound awakenings about themselves and their worlds in ethnic studies courses, making it an ideal subject for people looking to explore everything from race in the United States to the development of their ethnic identity. The minor requires 18 credits, 12 of which can be taken from a range of disciplines, including history, geography, social work, criminal justice, and more. Learn more about the new ethnic studies at weber.edu/socanthro/.

RELIGIOUS STUDIES MINOR

Department of History
Religion is a crucial part of human identity, community and history. Weber State is itself an increasingly diverse community of students and scholars, and it is important that we take the complexity and diversity of religion seriously in our global world. The religious studies minor helps students develop the critical tools needed to understand how religions function in human societies. Because it is an interdisciplinary minor, students are encouraged to take a variety of courses. Learn more about the religious studies minor at catalog.weber.edu.
ETHICS CERTIFICATE OF PROFICIENCY

Department of Political Science & Philosophy

Individuals completing the ethics certificate of proficiency will explore a wide range of theoretical approaches to resolving ethical problems, as well as a variety of applied moral issues across multiple disciplines. With the certificate, students will learn to think critically about and be able to address ethical problems that arise in their professional and personal lives. The certificate requires 18 credit hours and offers electives through multiple departments. Learn more about the ethics certificate of proficiency at weber.edu/polsc.

ALL CSBS MINORS

- Anthropology
- Criminal Justice
- Environmental Studies
- Ethnic Studies
- Geography
- Geography Teaching
- Gerontology
- History
- History Teaching
- International Studies
- Legal Studies
- Military Science
- Neuroscience

- Women & Gender Studies

ALL CSBS CERTIFICATES

- Ethics
- Forensic Science Fundamentals
- Geospatial Analysis
- Geospatial Technology
- Gerontology
- Juvenile Justice
- Sustainable Land Use Planning
- Victim Advocacy
Being a student is hard, however, when you have someone to guide you, it makes navigating school a lot easier. When I started college, my first goal was to get in and get out as fast as possible. I took 18 plus credits, and I had a full-time job. But because I didn’t do anything outside of myself, I started to get very bored and very lonely. Eventually, my coworker made me go on an Alternative Breaks trip through the Center for Community Engaged Learning (CCEL). On this trip, we went rock climbing, which is one of my favorite hobbies, but we also did service at Youth Futures. Youth Futures is a capstone project a WSU student made to help youth struggling through homelessness. I thought that it was so amazing that a student like me could do something far more meaningful than just school. The gears in my head changed, and I jumped at every opportunity to get to where I wanted to go.

I went on other Alternative Breaks trips—one to the Lakota reservation in the spring—and got a summer job with the community partner I worked with on that trip. I also continued going on the rock climbing Alternative Breaks trips with the Outdoor Program and went on almost every trip they offered. These trips are low-cost and are great if you are a beginner or a pro. I went whitewater rafting, rock climbing, repelling, ice climbing, snowshoeing and hiking. I eventually competed in their bouldering competitions and even placed every year.

In the academic realm, I applied for many scholarships and went on study abroad trips to Kenya, Ireland and Scotland for zero to little cost because of scholarships that are open to everyone. I joined the Moot Court Team and was able to go to Fresno. I also competed with Model United Nations in San Francisco, got an award, published a paper on structural inequality and now get to chair at the April 2024 conference in San Francisco. Because of that, I got to go to nationals in Germany, and we won an award. Next year, we will hopefully compete in the Galapagos for nationals again in Nov. 2024. In these competitions, I made friends from China, Ukraine, Japan, all over the U.S. and the Philippines.
While all of this was a lot, it really helped me realize that there is more to school than just running from Lind Lecture Hall to Lindquist Hall without saying a word to anyone. I realized school is supposed to be fun. And we are supposed to make friends. If I hadn’t tried something new, something outside of myself, I would have missed so much. I by no means am rich. I live paycheck to paycheck. And I am a first-generation student from a first-generation immigrant family who is learning as they go. But doing all these things smoothed out a lot of bumps in my road. I became friends with some of the most amazing people on campus. I even became friends with my professors and advisors.

If you can take any advice from me, it’s this. There is a whole army of people at this institution who want to help you, but they can’t if you don’t speak, they can’t if you don’t take the initiative to try something new. In short, they can’t if you don’t dream.

I’m close to graduation, and it’s a little scary, but I know if I keep in mind “it’s not about me it’s about the lives we touch.” I will be okay. So keep your chin up. You have a whole army rooting for you. If you just want a friend or want someone to bounce ideas off of or some advice on school, scholarships and life opportunities, email me at rubyvejar@weber.edu or message me on Instagram at @rubyvejar, and I would be more than happy to help out.

I remember my favorite quote from Mr. Rogers, the children’s show that taught me English because he spoke slowly, “In times of chaos and fear look around for those who are helping. Look for the helpers.”

Please let me be your helper.
We had many students present research at the Office of Undergraduate Research’s Fall 2023 Research and Engagement Symposium on Dec. 5. We are so impressed with our students and thankful for their faculty mentors.

CRIMINAL JUSTICE

- Dennis Lee: Published "The Relationship between Media Engagement and Procedural Justice" with WSU student Matthew Armocida in *Deviant Behavior*.

DEAN’S OFFICE

HISTORY

Abdulnaser Kaadan: Guest lecturer at the Federation of Islamic Medical Associations (FIMA) in Great Britain where he presented "Ibn Sina, the prince of physicians, and his influences on the western medicine" via Zoom. Invited by The History of Islamic Medicine (HIM) team of The Federation of Islamic Medical Associations (FIMA) to be a guest speaker and present "Avicenna: The Prince of Physicians and His Influences on Western Medicine" via Zoom. Presented "Autism and Acquiring a University Education: A Historical Background" at the 2023 Annual WSU Diversity Conference.

Leah LaGrone: Presented at the Jovita Idar Quarter Release Celebration in San Antonio for Hispanic Heritage Month - sponsored by the Smithsonian and the U.S. Mint. Guest historian on the *Historians at the Movies* podcast. Received the 2022-23 Jennings G. Olson Award.

Matthew Romaniello: Published "Commodities in Context: Moving Materials and Medical Knowledge into Medieval Russia," in *Canadian-American Slavic Studies*.

Stephanie Wolfe: Elected First Vice President of the International Association of Genocide Scholars for the 2023-2025 term.

Aminda O'Hare: Gave two webinars on "Mind-Body Connections and Whole-Person Wellness: The Role of Mindfulness" for the Florida Library Association and the American Library Association.
Aminda O'Hare & Timothy Black: Sponsored a collaborative student research presentation at the annual meeting for the Society of Psychophysiology, presented by alumnus Jamie Heiner and current student Hannah Hughes. The presentation was titled, "Self-Report and Salivary Alpha Amylase as Indicators of Educator Burnout." O'Hare also sponsored two other research projects, one presented by alumnus Rochely Martinez-Negron - "Replicating the Effects of Test Anxiety on Cognitive Control: An ERP Study" and another presented by alumnus Grace Winder and current student Benson Bush - "Replication of the Color Flanker Task with Emotional Words: A Dual Anxiety Approach." These projects represent the collaborative work within the Department of Psychological Science and the Neuroscience Program.

Sarah Herrmann: Received the 2022-23 Gene Sessions Excellence in Teaching Award.

Leigh Shaw: Completed the Association of College and University Educators (ACUE) course in Inclusive Teaching for Equitable Learning and the ACUE course in Designing Learner Centered and Equitable Courses. Awarded microcredentials in each.

Leigh Shaw & Cade Mansfield: Attended the 13th Biennial Conference of the Society for the Study of Human Development in Philadelphia, Pennsylvania with psychological science students Madisyn Carrington, Sydnee Eubank and Thomas Frazier. Shaw and Mansfield presented a paper in a symposium on narrative meaning making in adolescence, and Madisyn, Sydnee and Thomas each presented a poster on data from research collected and coded in the social development lab.

SOCIAL WORK & GERONTOLOGY (CONT’D)

- **Steven Vigil**: Gave a workshop presentation "Mindful Approach to Inclusivity - Bias, Transference, and Counter-Transference" at the Zero Suicide Summit 2023.

SOCIology & Anthropology

- **Joanna Gautney**: Published "A new approach to exploratory data analysis in hominin phylogenetic reconstruction" in the *Journal of Human Evolution*.
- **Huiying Hill**: Published "Book review: A Decade of Upheaval: The Cultural Revolution in Rural China" in the *International Journal of Comparative Sociology*.
- **Madeline Mackie**: Co-authored "The Geochronological and Geoarchaeological Context of the Clovis-Age La Prele Mammoth Site (48CO1401), Converse County, Wyoming" in *PaleoAmerica*. Published "Beyond market share: Accounting for doctoral program size in recent rates of anthropology faculty job placement" in *PLoS ONE*.
- **Carla Trentelman**: Participated in a panel presentation “Teaching Society and Natural Resources in a Convergent World" at the 2023 International Association for Society and Natural Resources (IASNR) Conference in Portland, Maine.

Milestones

**15 YEARS**
