

Post-Reflection

CDEV SkillsSurvey

Purpose:

Students and Administrators identify what NACE competencies the student has strengths in and which competencies they can improve upon.

Steps for Post-Reflection:

1. Administrators meet with the student to discuss their results.
 - a. Review how the Administrator scored the student, then compare to how the student scored themselves.
 - b. Review how the student ranks to other students nationally.
 - c. Pick one or two behaviors for the student to work on.
2. Administrators should follow up about every four weeks with the students on the behaviors they are working on.
3. If a student works multiple semesters then SkillsSurvey should be completed each semester to show their improvement.
