TEACHER TWILIGHT SERIES

Increasing Critical Thinking to Understand and Respond to Climate Misinformation

Gain a new appreciation for the importance of critical thinking as both a resource and way of thinking. Learn the fallacies in the most common climate myths, and how to detect reasoning fallacies in other arguments. Most importantly, come away empowered to talk about climate change, with newfound confidence in responding to potential climate misinformation.

presented by

John Cook,
research assistant professor at the Center for Climate Change Communication at George Mason University

Light dinner will be provided.

Thursday, March 19th
4:30 p.m. - 7:00 p.m. in TY 102
