BIOEYES
Bring Live Science to your classroom.

September 6th, 2018
4:30 p.m. - 7:30 p.m.
Tracy Hall Science Center
Room 234

Learn how to set-up an aquarium to use zebrafish to teach about life cycles, habitats, organ function, embryology and genetics through real-world applications. The activities can be tailored to specific science standards from second grade to high school using a 3D approach to learning science.
