RE: Dean response to CIDA review

To Whom It May Concern:

On behalf of Weber State University College of Engineering, Applied Sciences & Technology (EAST), it is a pleasure to write this response for the recent CIDA review of the Interior Design program.

CIDA has accreditation standards that address the institutional systems, structures, and resources that are fundamental to providing an effective higher education learning environment for interior design programs. As the CIDA team showed that the program has earned another six years of accreditation I support the CIDA finding. As the CIDA team has noted that the program will do a three-year mid-term review, I support the program for that review.

It is a priority in EAST to support programs that will have a long-term impact on our students and community. I fully support the efforts of the Interior Design program. I believe that the program will continue to foster the kind of knowledge base needed to support our undergraduate students as they apply their skills towards novel and recognized approaches in Interior Design benefitting the community and the students themselves.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dr. Ferro'.

Dr. David L. Ferro, PhD
Dean, College of Engineering, Applied Sciences & Technology (EAST),
Weber State University.

Dean, College of Engineering, Applied Science & Technology
