

Submitted June 1, 2023 (via email)

Author: Reineke Holman, Chair, School of Nursing

We are aware of the 2023 ACEN Standards and Criteria, which schools will be held to starting Jan. 1, 2024. To be compliant with the new standards by our next site visit, we have already made the following changes:

-We have changed our tracking methods to track on-time completion rates rather than 150% completion rates.

-We have changed our program survey verbiage to match the ACEN standards indicating job placement in roles in which students are prepared.

-We are revising our website and program sites to ensure information is accurate, clear, consistent, and accessible.

-We are constantly trying new strategies to improve our job placement response rates, such as sending surveys to students' personal emails.

-We are constantly reviewing and revising the curriculum to reflect national standards and contemporary practice.
