How to Apply

Applications should be made by May 1 for fall semester admission. Applications may continue to be accepted beyond the priority deadline as space is available.

Admission to the MSRS Cardiac Specialist emphasis program requires:

- Graduate of an accredited baccalaureate academic program in health sciences preferred (includes, but is not limited to, cardiovascular technology, ultrasound, radiologic technology, respiratory therapy or nursing). However, other baccalaureate programs will also be considered.
- Current Basic Life Support (BLS) certification.
- Identification of a preceptor (registered technologist, supervisor or licensed physician) and clinical site.
- International applicants have additional admission requirements.

Find all requirements and apply online at weber.edu/msrs.

LEARN WITH PURPOSE, THEN LEAD WITH PASSION
weber.edu/msrs

For more than 50 years, the School of Radiologic Sciences at Weber State University has been a leading provider of classroom theory and practical application. Move your career ahead by earning your MASTER'S DEGREE. In our Master of Science in Radiologic Sciences program, you can focus your education in areas of advanced practice, research, interprofessional education and more.

WSU does not discriminate on the basis of race, color, national origin, pregnancy, genetics, age (over 40), disability, religion, sex, sexual orientation, gender identity/expression, veteran, active military status and other classifications protected by law in its programs and activities. Information is available from, and discrimination and harassment complaints may be filed with the Executive Director of AA/EO, AA-EO@weber.edu, MA 101 or 801-626-6235.
Webber State's Master of Science in Radiologic Sciences (MSRS) is now offering the first graduate degree in the nation in Cardiovascular Technology.

Why Earn Your Graduate Degree at WSU?

Webber State's MSRS degree was designed with working professionals in mind.

Courses are delivered in a hybrid format, which combines face-to-face learning with online learning. You'll only have to come to Webber State's campus two to three times each semester to fulfill your course requirements.

You'll strengthen your critical-thinking skills and learn advanced techniques in patient care to become a better healthcare provider.

You'll conduct your own research or participate in a school research project for a master's thesis.

Plus, we offer discounted tuition for out-of-state students.

What You Will Learn

The Master of Science in Radiologic Sciences (MSRS) with emphasis in CARDIAC SPECIALIST prepares students with the knowledge and clinical skills necessary for a career in the cardiac cath lab.

Students will develop analytical thinking skills and research capability while studying a wide range of disciplines including coronary and structural heart disease, multimodality cardiac imaging, and interventional cardiac catheterization.

Students will learn alongside a multidisciplinary team of professionals while assisting with cath lab procedures such as angiography, hemodynamic assessment, coronary stenting, and valve implantation.

Upon graduation, students will be qualified to sit for the Registered Cardiovascular Invasive Specialist (RCIS) and/or the Cardiac Interventional Radiography (CIR) exam.

Program Requirements: 59 credit hours completed over 4 semesters

Preceptorship

Students are responsible to identify a preceptor who will work with them during the program to complete 24 hours of clinical experience each week.

A signed preceptor agreement form from a clinical-practice site and a preceptor (registered technologist, supervisor or licensed physician) will need to be submitted with the online application.
