

# The Neuroscience Lecture Series

## Graduate Student Panel: What to Expect in Graduate School

### Keith Jones

Neuroscience Ph.D. Program

My research focuses on understanding and developing novel treatments for treatment-resistant depression. I work with human subjects and use non-invasive imaging techniques such as MRI and EEG to explore the biological mechanisms underlying antidepressant response.

### Erica Barhost-Cates

Psychology Ph.D. Program - Cognition and Neural Science

My research aims to understand the effects of experience on spatial cognitive abilities, including visual perception and navigation. Using real and virtual reality techniques, I measure how individual differences in movement experience (such as through sports and dance training) and vision loss (in clinical low vision) affect spatial thinking and navigation.

### Robert Vlisides-Henry

Psychology Ph.D. Program – Clinical Child and Family

My research goals are focused on understanding the biosocial impact of transition points throughout the lifespan (e.g., birth, puberty, young adulthood) on emotionally dysregulated individuals. Through the lens of developmental psychopathology, I am examining these effects across multiple levels of analysis (e.g., peripheral psychophysiological markers, moment-to-moment observational coding).

### Robyn Kilshaw

Psychology Ph.D. Program - Clinical Child and Family

I am interested in the developmental consequences of early adverse experiences--in particular childhood maltreatment and other interpersonal trauma. At the U, I am researching the role of traumatic experiences in the development of callous-unemotional traits and delinquent behaviours in juvenile justice-involved youth.

Are you interested in attending graduate school? Do you want a better idea of what to expect, how to pay for, and how to get admitted into graduate school? If so, join these University of Utah graduate students for a panel discussion.

**Friday, February 22, 2019 | 12:30pm | Lindquist Hall 104**

The panel will have lunch with a small group of students at 11:30 am and then present to a larger group of students at 12:30 pm (pizza will be provided to all that attend the lecture). If you are interested in attending lunch with the panel please email Roe School at [rosemarieschoof@weber.edu](mailto:rosemarieschoof@weber.edu)
