

## Green Team Leader T-shirt Point Guidelines (Covid-19 addition):

How it works:

- **Step 1-** Snap a photo of yourself wearing your t-shirt. *If you do not have a t-shirt, email your department office number, mailing code, and t-shirt size to [kyiahill@weber.edu](mailto:kyiahill@weber.edu) to receive one. If you are not on campus this semester, please see **Step 3**.*
- **Step 2** -Upload your department name and a picture of you wearing your t-shirt to the [Green Team Reporting and Request Tool](#) (also found on our [website](#)).
  - Note:
    - *Deadline to submit is every second Wednesday of each month unless specified otherwise via the monthly Green Department update emails.*
    - I will ask permission to use your photo in the form. If you do not wish your photo to be shared on our social media or our websites, that is okay! You can still earn points just indicate on the form your preference.
    - Reminder: If your team participates every second Wednesday of each month 4 or more times per year you can earn 1 point or 7 or more times per year you can earn 2 points. These points double the second year.
- **Step 3 (Optional)**- If you are working from home, you can participate. If you have a t-shirt, wear it. Snap a photo of yourself showing one action you are doing at home to be more sustainable (Have fun with it!). Then submit your photo to [Green Team Reporting and Request Tool](#) (also found on our [website](#)).

- I will ask permission to use your photo in the form. If you do not wish your photo to be shared on our social media or our websites, that is okay! You can still earn points just indicate on the form your preference.
- Reminder: If your team participates every second Wednesday of each month 4 or more times per year you can earn 1 point or 7 or more times per year you can earn 2 points. These points double the second year.

Examples: Picking up trash on a walk or hike, planting a garden or composting, upcycling an old t-shirt into a DIY face mask, switching to LED lights in your home, switch to a low flow showerhead, or using package-free bars of soap, etc. Anything you are doing to help reduce your footprint at home, we want to see it!
