ACTNow Tool

The ACTNow tool is designed to support the transition process and improve students' self-determination skills through improved self-awareness and self-knowledge. These are critical skills for students with disabilities who are transitioning to employment and into their communities after high school. ACTNow is a valid and reliable measure for high school students.

Randomized Controlled Trial

The research reported for 2018-2019 is supported by the Institute of Education Sciences, U.S. Department of Education, through Grant R324L180011 to Weber State University. The opinions expressed are those of the authors and do not represent views of the Institute or the U.S. Depart. of Education.

603

Total contacts and applications across all agencies for students in the ACTNow treatment Group

90

Total contracts and applications for students in the control group.
